

BEST PRACTICE CHECKLIST FOR **SAFE & HEALTHY EVENTS**

CLEARED4 is the leading global platform supporting safety for events large and small. Across Corporates, Venues, and Schools, staff and guest safety is the no. 1 priority for any gathering today.

We offer a real-time dashboard and communication tools to manage your health surveys, remote and on-site testing, vaccine verification and even linking your custom rules to access control/ticketing, all in one place.

We handle everything you need before, during, and after your event to maximize safety! Ensure you are doing everything you can to keep your staff and guests safe with the checklist below.

- Do you have an event-based Health and Safety playbook?
- Have you established rules regarding vaccination and/or boosters requirements for entry to the event?
- Are you planning on testing before or during the event?
- Have you created a testing protocol for your event? If so, do you have a preferred testing partner?
- What type of test will you be using for your event? (antigen, PCR, or molecular)
- Will video proctoring be needed to validate home testing results?
- Do you have protocols in place if you have a positive test or symptoms? Is there a contact tracing plan to notify or test others who may have been exposed?
- Do you have the resources needed to implement your playbook or do you need assistance?
- Are you planning to assess the safety of the space in advance of your event?
- Before the event, are you going to require a health survey?
- Will you do any post-event testing or health surveys?
- Are you requiring an event access pass to confirm all health requirements are met?

Pre-Event

During Event

Post-Event

“Events can be held during the pandemic but precautions may be necessary to optimize everyone’s health and safety”

- Dr. Soumi Eachempati, Co-Founder and CEO of CLEARED4
